

REMOTE ANALYSIS SERVICES

Maintain ownership of your in house program

Have access to Level 2 and Level 3 Certified Analysts

Optimize the cost structure of your program

Have the option to pause and restart the program at any time

HOW IT WORKS:

1. Purchase, Lease, or Rent a Data Collector
2. Submit a list of Machines to PDM to be routinely monitored
3. PDM will Create the Database (may require site visit) and Send the Route files back for transfer to data collector
4. Collect the readings indicated on your machines
5. Transmit (email / drop box) the data back to PDM for analysis
6. PDM analyzes the data and generates a deficiency report
7. Repeat each Month or Quarter
